## JONATHAN WARD, AIA, LEED ap Partner, NBBJ

Immense changes are under way in our world and in our profession. Many are bellwethers of more dire conditions to come which will dramatically affect our natural environment, while others are simply changes that we can control and craft into a positive future. Jonathan Ward, designer of such projects as the Reebok World Headquarters and the Samsung Learning Center will use a collection of recent projects at NBBJ to initiate a New Dialogue about the creation of the **green campus for the future**. At the root of this New Dialogue we believe that the greatest opportunities for innovation and real change are to be found in reducing the consumption of Resources, enhancing the daily experience of People and increasing functional and cost Efficiency.
