Synopsis

Carbon Neutrality and Climate Resilience 碳中和及氣候抵禦力

In 2021, the HKSAR Government announced HK's Climate Action Plan 2050, leading HK to achieve carbon neutrality before 2050. In line with the city's climate commitments, the Hong Kong Green Building Council (HKGBC) launched HK's first "Climate Change Framework for Built Environment" (Framework) in June 2023, aiming to support the local building industry transition to net zero emissions and climate resilience.

Zero-Carbon-Ready Building Certification 零碳就緒建築認證

The Framework assists the building industry in setting net zero carbon goals, reporting environmental, social and governance (ESG), justifying green finance requirements, and disclosing climate risk strategies. As part of the Framework, HKGBC is launching the "Zero-Carbon-Ready Building Certification Scheme".

Rundown Speakers

Introduction of the Framework

Ir Dr Cary CHAN, JP
Executive Director of HKGBC
(Framework Convenor)

Embodied Carbon

Prof. Jack CHENG
Associate Head and Professor of the Hong Kong University of Science and Technology

Operational Carbon

Ir Dr. Raymond YAU
General Manager
Technical Services & Sustainable Development of Swire Properties Limited

Climate Risk Assessment & Disclosure + Adaptation & Resilience

Ms. Grace KWOK
Chairman and Executive Director of AEC Group

A Respondent's Perspective

Ar K.S. WONG, GBS, JP
Distinguished Department of Architecture Fellow, The University of Hong Kong
Former Secretary for the Environment, HKSAR Government

Panel Discussion + Q&A

Facilitator
Ar Yvonne IEONG
Chair of Environment & Sustainable Development Committee, HKIA

Co-organised by:

香港建築師學會
The Hong Kong Institute of Architects

Supporting Organisations:

HKIA Carbon Neutrality Task Force
HKIA Environment & Sustainable Development Committee

HKIA Circular: 45/2023
CPD Circular: 27/2023
